

FIELD VERIFICATION (SITE INSPECTION) OF EQUIPMENT AT INSTALL IS REQUIRED!

Field verifications of equipment installations are required as required by IFC 2018 and NFPA 1, 2018 for all instances that PSI's engineering peer review is used to gain approval from an Authority Having Jurisdiction (AHJ).

The design of this equipment has been found suitable for use provided that the equipment is fabricated and assembled using the components listed on the design documentation provided for the engineering peer review.

The engineering peer reviews offers conditional approval of the equipment design only.

At installation, the equipment must be successfully field verified by PSI to confirm the equipment was supplied and installed in accordance with this report in accordance with CFC 2019; IFC 2018; NFPA 1 2018; WAC 51-54A-3800.
